

Bloomy Controls Completes NI Certification

Company Has Most Certified Instructors and Only TestStand Advanced Instructor Outside NI

After completing National Instruments technical and instructional certification exams in October 2002, Bloomy Controls engineers earned eight Certified LabVIEW Developer and nine Certified Professional Instructor certifications. Combined with previously earned NI certifications, the company now has the most certified professional instructors, including the only Certified TestStand Architect qualified to teach the TestStand Advanced System Design course, outside NI.

“The National Instruments certification program is a credible way of determining expertise with NI products,” says Dan Phillips, NI manager of training services. “By checking for certification, customers can have greater confidence that they are working with highly qualified professionals.”

Bloomy Controls holds the following NI certifications:

Certified LabVIEW Developer

- Peter Blume
- Keith Brainard
- Greg Burroughs
- Anthony Conaci
- Robert Gough
- Robert Hamburger
- Rob Michell
- Catherine Petronino

Certified TestStand Architect and Developer

- Matthew Kennedy

Certified Professional Instructor

- Peter Blume
- Keith Brainard
- Greg Burroughs
- Anthony Conaci
- Robert Gough
- Robert Hamburger
- Matthew Kennedy
- Rob Michell
- Catherine Petronino

The NI certification program provides professional recognition for individuals displaying a high degree of knowledge and skill with NI products. Certifications are classified in two categories, technical or instructional. Technical certification is further subdivided into areas of expertise with a focus on specific hardware, software, and the use of NI products to provide solutions for industry. Instructional certification ensures that individuals presenting training on NI products are able to effectively present complex technical subjects to adult audiences. ↷
